

FISHERIES

With the growing concern of fisheries product by the global consumers regarding the contaminated product, GMO products, environmental impacts and even the social impacts which leads to the increasing demand of sustainable practice in fisheries business. This practice applies to both wild caught fish business as well as aquaculture/farmed fish business. Therefore, consumers need standards on this sustainable practice to ensure the fisheries business owner practice the sustainable fisheries.

The Aqua Stewardship Council (ASC), The Marine Stewardship Council (MSC), Global G.A.P. Aquaculture Base, Best Aquaculture Practices (BAP) and Friend of the Sea (FOS) have developed acknowledged Chain of Custody standards for fisheries business globally. Each standard has different uses related to the type of fisheries business. The ASC, Global G.A.P. Aquaculture Base and BAP standard cover the farm fisheries business, while the MSC standard cover the wild caught fisheries. Additionally, the Friend of the Sea scheme cover for both aquaculture and wild caught fisheries.

Getting your business certified can be a big opportunity in the future for your business. The market demand and price for labelled certified product is considered premium compared to the non-certified product due to the rising of environmental issue today and more consumer require company to practice sustainable fisheries.
